Mr. Greeley never spoke a truer or more timely word in his life than when he denounced the carpet baggers to the people of New York city They are doing more harm to the country to-day than the locust or caterpillar, or any other kindred pest. They are teaching the less intelligent and discriminating Southerners to despise and hate the Northern people more heartily than ever; they are debauching the freedmen; they are bringing disgrace upon the great Republican party and upon the National Government. That their rapacity is insatiable and that they steal every penny they can lay their hands on, are comparatively trivial counts in the indictment against them. Yet this more heartily than ever; they are constant plundering is a very serious matter to the communities which are lundered. It means increased indebtedness and heavier taxation. One specimen job has just come to our no-tice. The Mississippi public schools were lately supplied with 7000 desks at even dollars per desk. Market price, \$3.50; carpet-baggers' profit, \$24,500. This is a very small affair, to be superwhen compared with the wholesale stealings in South Carolina, but it illustrates how the thing is done. It is just such rescality that is making the name of Republican a stench in the Southern States, and bringing sus picion and enmity upon honest immalgrants. And matters will not mend nuch so long as needy and greedy adventurers are appointed to respon

Why Congress should have laid a pess agent of Mrs. Wharten, and tax upon the export of cotton, directly knew of the existence of the note in tax upon the export of cotton, directly after the close of the war; has never been understood, except upon the ground that it was to punish the section which had been vanquished. It was the time to extend all possible aid to the South to enable it to bear its share of the heavy financial burden the country was obliged to carry. But a revengeful, avaricious policy prevailed, levying a tax at once illegal and unconstitutional, because it violated the rules of apportionment, was not accompanied by representation, and because it was not uniform. Another objection to such a tax was that it was laid upon a special agricultural industry, instead of including all affect.
